Tools in compliance with data protection at TUB

Apart from the TU eLearning environment ISIS/moodle and various web conference tools you will find numerous digital tools online that seem to potentially enhance your curriculum and provide a broad spectrum of digital teaching methods. There is a caveat, though: tools you choose have to comply with data protection regulations at TU Berlin and in relation to teaching at higher education. Selection processes can be tidious, this is why we provide a list of tools that are compliant for use in online and offline educational settings.

PINGO (Peer Instruction for very large groups)
